# ADITYA GARG

+91 9896518857 | adityagarg535@gmail.com | Bengaluru, India
LinkedIn | GitHub

## EDUCATION

**RV University, Bengaluru** *Aug 2022 – Aug 2026*
*B.E. in Computer Science & Engineering* | CGPA: 6.60

**Sky Hawk International School, Delhi** *2022*
Grade XII (CBSE) | 72%

**Scholars Rosary Senior Secondary School, Rohtak** *2020*
Grade X (CBSE) | 88.5%

## EXPERIENCE

**Frontend Web Developer Intern** *Jan 2024 – Apr 2024*
*Curium – Medical Transcription* | Bengaluru, India

- Built a full-stack medical imaging tool using **React.js, Django REST APIs, and PostgreSQL** for hernia diagnosis, enabling clinicians to upload and review diagnostic images.
- Designed responsive UIs with image visualization and annotation features, improving doctor feedback workflows.
- Collaborated with backend developers to ensure seamless API integration and optimized cross-application data flow.

## PROJECTS

**Gmail Phishing Detector – Chrome Extension** [GitHub]
*Python, DistilBERT, Scikit-learn, FastAPI, JavaScript, Chrome Extensions API*

- **Problem:** Phishing emails bypass standard Gmail filters, exposing users to credential theft and fraud.
- Built a Chrome extension using **DOM parsing + MutationObserver**, combining a fine-tuned **DistilBERT model** for email analysis with a **Random Forest pipeline** for URL threat scoring, served via FastAPI.
- **Impact:** Achieved **90%+ detection accuracy** with probability fusion logic that reduced false positives, injecting inline warnings directly inside Gmail.

**Real-Time Sign Language Detector**
*Python, TensorFlow/Keras, OpenCV, NumPy*

- **Problem:** Hearing- and speech-impaired individuals face communication barriers where interpreters are unavailable.
- Built a real-time recognition system using **OpenCV + CNN (TensorFlow/Keras)**, detecting all 26 English alphabet gestures via webcam with data augmentation.
- **Impact:** Achieved robust detection across varied lighting and hand orientations, enabling real-time gesture-to-text translation.

**Portfolio OS – Terminal-Driven Developer Portfolio** [GitHub]
*Next.js 16, React 19, Tailwind CSS v4, Framer Motion, Zustand, PostgreSQL, Prisma ORM, Vercel*

- **Personal Project:** Built an OS-style portfolio where visitors navigate via a **floating terminal widget** with commands (about, projects, skills, theme), featuring **4 switchable themes**, animated transitions via Framer Motion, and a **PostgreSQL backend (Prisma + Neon)** that logs visitor sessions and stores contact messages.
- **Impact:** Deployed on Vercel with CI/CD via GitHub Actions; features command history, keyboard shortcuts, resizable terminal, and real-time visitor analytics.

## TECHNICAL SKILLS

**Languages:** C/C++, Java, Python, JavaScript, TypeScript, HTML/CSS
**ML / Data Science:** TensorFlow, Keras, Scikit-learn, Pandas, NumPy, OpenCV, Transformers (HuggingFace)
**Frameworks & Libraries:** React, Next.js, FastAPI, Flask, Django REST Framework, Tailwind CSS, Framer Motion, Zustand
**Developer Tools:** Git, Docker, PostgreSQL, MySQL, Prisma ORM, Supabase, Vercel, Postman, VS Code
